

How to Correctly Repair a Ball Mark on a Green

CORRECT

1. Discard the loose piece of turf taken out by the ball.
2. Insert the repair tool just outside the back of the ball mark.
3. Pull the turf toward the center of the hole and repeat from other sides of mark.
4. When completed the ball mark area should be **completely green** with grass, not brown with soil
5. Gently pat down the repaired turf over the ball mark, providing almost instant recovery.

BEFORE

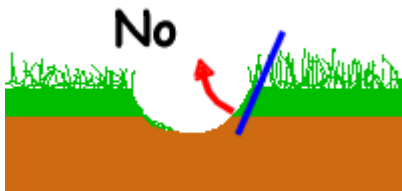

AFTER

INCORRECT

1. Do not replace the loose piece of turf taken out by the ball
2. Do not pry up the center of the depression with the repair tool as it exposes the soil, damages the root system, and will delay the healing process.
3. Do not insert the repair tool and twist it. This will also damage the root system.
